

PISCES ENTRY FORM INSTRUCTIONS

Download the blank Adobe Acrobat Electronic Form from the PISCES download section

Save the blank form to your local Hard Drive in a place which you will remember so that you can use the form again.

Completing the form is simply a case of entering the information in the light blue boxes opposite a question. If it is a YES/NO question, clicking in the box will enter a TICK. If you make a mistake, just click in the opposite box and a TICK will be placed there and the other TICK will be cancelled.

Date fields on the form require a specific entry format which is DD/MMM/YYYY e.g. 07/Jun/2005 or 28/Oct/2004 etc.

Blood Pressure fields are restricted to a range of numbers which are synonymous with Systolic & Diastolic pressures e.g. in a Systolic field the maximum number you can enter is 300 and the minimum is 40.

Clicking the RESET button will clear ALL data from ALL fields on the form.

Clicking the SUBMIT button will send the form data to the system administrator for **backup** purposes. When you click on SUBMIT, your e-mail client will be opened and the form data will be sent as an attachment when you next communicate.
